

# Meeting announcement **High Energy Astrophysics: the keV-TeV Connection**

In the frame of the European Astronomical Society (EAS) annual meeting in Yerevan August 20-25 2007 (JENAM 2007) we are organising a 2.5 days EAS symposium on high energy astrophysics.

The main goal of this meeting is to bring together the high energy astrophysics community working not only on the space based X-ray and gamma ray energy domains (keV-GeV), but also the ground based GeV-TeV community. We have indeed seen a number of breakthroughs in the Cerenkov detection technology that have brought many very new results. These results are important for the understanding of the physics of many high energy astrophysical sources. It is therefore particularly timely to bring closer the communities working on all aspects of observations and modelling of these sources to cross fertilise.

The meeting will also discuss a number of space borne and ground based projects that are being discussed now with a view to harmonise the developments. This latter element will be of particular importance in Europe in the next years with the implementation of ESA's Cosmic Vision programme and the progress of some European Union initiatives in ground based high energy astrophysics.

The meeting will be organised in 5 sessions on:

**The high redshift high energy Universe**  
**High Energy Phenomena in Relativistic Jets**  
**Dark Matter, Neutrinos and Cosmic Rays**  
**Galactic sources**  
**The instrumental landscape now and in the future**

Invited speakers who have confirmed their participation include:

P. Coppi (TBC)	G. Bisnovaty-Kogan	R. Sambruna
J. Paredes	D. Hannikainen	John Carr
P. Blasi	A. Bykov	S. Bogovalov
A. parmar	T. Courvoisier	M. Tavani (TBC)
F. Aharonian	X. Barcons	

There will be ample time for contributed talks (15 minutes) and room for posters. Emphasis will be given on discussions, both formal and informal.

Please submit abstracts for consideration as oral contributed talks or posters on the conference web page: <http://www.aras.am/JENAM-2007/index.htm>. The deadline for submission is May 1st.

Information on the local organisation (registration, hotels etc) can be found at <http://www.aras.am/JENAM-2007/index.htm>. The LOC is chaired by A. Mickaelian (aregmick@apaven.am)

The SOC:

F. Aharonian, X. Barcons, T. Courvoisier (chair; [thierry.courvoisier@obs.unige.ch](mailto:thierry.courvoisier@obs.unige.ch)), G. Hasinger
